

## Meeting Report: Required System Enhancements

### Key Points / Requirements

1. **Manual Fee Configuration**

The system must allow administrators to manually add, edit, and manage fees across all loan products offered by the company.

2. **PPSR Collateral Validation**

The loan issuance process must include verification of collateral through the **Personal Property Security Registry (PPSR)** in Malawi ([ppsr.registrargeneral.gov.mw](http://ppsr.registrargeneral.gov.mw)) to confirm collateral validity before loan approval.

3. **Customer Credit Score Summary**

The system should generate a summarized credit score based on customers' disbursed and closed loans. This score will be used to determine customer incentives, such as offering discounts or reducing charges for customers with high credit scores.
